Detailed Action: Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2 & 6-15, pertain to a shadow mask material and uses for that material, classified in class 313, subclass 402.
 - II. Claims 3-5, pertaining to a process for manufacturing a shadow mask material, classified in class 148, subclass 652.

The inventions are distinct, each from the other because of the following reasons:

2. The two inventions are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product could be made by a materially different process, for instance, the shadow mask material could be made by a powder metallurgy method.
